

OptiDisc™ | High-performing polishing and contouring disc is now even easier to choose!

FEATURES & BENEFITS

OptiDisc™

- The translucent material affords great visibility of the working area, for extra precise finishing.
- Made of polyester coated with aluminium oxide particles.
- Patented mandrel coating for avoiding scratching or coloring of the teeth.
- Long-Lasting performance.
- 4-grit sizes for contouring, finishing, polishing and high gloss-polishing.
- The colour coded system allows you to easily identify the appropriate grit level based on your procedural needs.

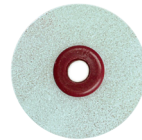

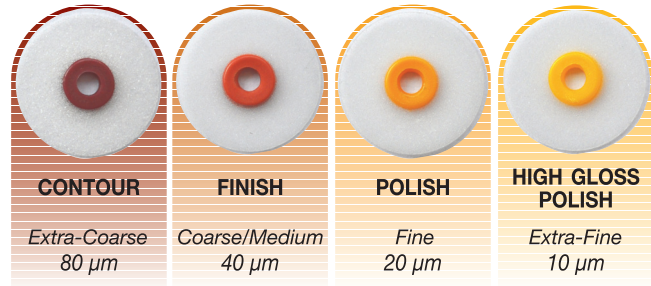

OptiDisc™ Mandrels

- Patented mandrel coating for avoiding scratching or coloring of the teeth.
- Optimal torque transmission to disc, no sliding.
- Mandrels are autoclavable.
- 2 Mandrel sizes & lengths.
- The shorter mandrel facilitates an easy access to posterior and other restricted areas.

Easy to recognise colour-coding

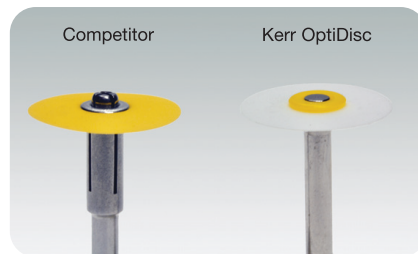

Colour coded stages of abrasiveness means easy recognition of grit size and clinical step.
