

CURASEPT[®] BIOSMALTO

SENSITIVE TEETH LINE

NEW STRENGTH FOR YOUR ENAMEL

www.curaseptworldwide.com

Dental enamel and tissues are exposed to

RISK FACTORS

every single day:

**SUGARY AND
ACIDIC FOOD**

**GASTRIC
ACIDS**

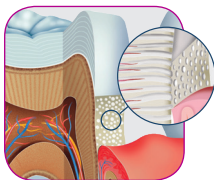

**INADEQUATE
TOOTHBRUSHES AND
ABRASIVE TOOTHPASTES**

**INADEQUATE
AND POOR ORAL
HYGIENE
BACTERIAL PLAQUE**

The impact of one or more of these aggressive factors could cause a loss of minerals, which may have serious

CONSEQUENCES

**DENTAL
SENSITIVITY**

Dental sensitivity is one of the consequences that can lead to acute pain after thermal, tactile, chemical or physical stimuli. High dental sensitivity can be caused by the loss of enamel, periodontitis and / or receding gums that expose the underlying dentine to the oral environment.

ONCE DAMAGED, ENAMEL AND DENTINE CANNOT REPAIR THEMSELVES WITHOUT SPECIFIC PRODUCTS THAT PROMOTE THE FORMATION OF NEW HYDROXYAPATITE CRYSTALS.

After **7 years of research** conducted in collaboration with prestigious partners, Curasept developed an innovative formula with substituted Hydroxyapatite

CURASEPT® BIOSMALTO

SENSITIVE TEETH LINE

IT REDUCES TOOTH SENSITIVITY RAPIDLY
AND IT CREATES A NEW MINERAL
PHASE THAT IS MORE RESISTANT TO ACID
ATTACKS AND OCCLUDES EXPOSED
DENTINAL TUBULES

Specifically indicated for patients with acute or recurring dental sensitivity.
